Distinction between the German and American population, 91 — redemptioners, 92 — destitution of instruction — description of a foreign schoolmaster, 93 — superstitions, 95 — want of books — German newspapers, 96 — seminaries — danger to our institutions arising from ignorance.

LECTURE V.

ON RELIGIOUS EDUCATION. By R. Park. 99

Importance of the common school system, 101 — author's views not sectarian, 102 — present the claims of the principles of the New Testament — address to the deist — to the Atheist, 103 — importance of a relig-

ious education, 104 — of the manner of imparting religious instruction — duty of parents in this respect, 105 — of the sacred desk, 107 — of the schoolmaster — rules for their direction, 108 — sectarianism to be avoided, 109 — importance of Sabbath Schools, 110.

LECTURE VI.

ON THE IMPORTANCE OF AN ACQUAINTANCE WITH THE PHILOSOPHY OF THE MIND TO AN INSTRUCTOR. By J. Gregg. 111

Importance of the science, 113 — answer to the inquiry what is the Philosophy of the human mind — systems of various philosophers, 114 — true system not yet developed, 115 — defined, 116 — mode of acquiring a knowledge of it, 117 — the philosophy of mind teaches, 1st. the true *nature* of education, 118 — education is a process of developement — 2d. it teaches the true *method* of education, 121 — the mind is a field to be cultivated — 3d. it teaches the true *means* of education, 123 — studies, books and instruction — 4th it teaches the true *ends* of education, 127 — effects of utilitarian philosophy — education its own end, 128.

LECTURE VII.

ON THE ENDS OF SCHOOL DISCIPLINE. By Henry L. Mc Kean. 131

Education a preparation for life, 133 — for practical life, 134 — education not completed even with life, 135 — early instruction a preparation for self education, 136 — end of discipline the developement of the mental powers — motives to be presented, 137 — effect of punishment, 138 — of rewards — exercising the memory, 143 — modes of communicating knowledge, 145 — the master must take an interest in the pursuits of the pupil — children should be encouraged to exercise their faculties, 146 — influence of sympathy on the part of the instructor, 147 — moral discipline, 148 — punishment, 150 — religious instruction.

LECTURE VIII.

ON THE IMPORTANCE AND MEANS OF CULTIVATING THE SOCIAL AFFECTIONS AMONG PUPILS. By J. Blanchard. 153

I. Definition of the social affections — external nature arranged so as to excite and bring to perfection the social feelings — thus shewing the importance which God attaches to them — a survey of the animal world and the chain of intellectual beings calculated to produce the same effect.

II. Importance of the social affections inferred from the rank they hold among the powers of the soul — from their agency in all our sorrow and joy — this illustrated by a family picture — ill-regulated social feeling the

cause of "low spirits" — of the more violent passions — illustrated by Romish priests — by modern infidels — the two classes compared — the importance of the social affections inferred from their influence upon the soul's standing in a future state — old age and death a brief interruption, not an end of the soul's progress to perfection — the social blessings of this life contrasted with those of the next — if ever the social affections are cultivated it must be while the mind is young — proved from Stewart — illustrated.

III. Means by which a preceptor may cultivate the social affections of his pupils — 1st. he must be impressed with its importance — intellectual progress not social improvement — writers on intellectual philosophy have neglected the every day intercourse of man — reason why — 2d. the preceptor must remove all external obstacles to the social enjoyments of pupils — bad rooms &c. — 3d. reasons why pupils hate each other — Paley's method of subduing anger applied to this hatred — 4th. how the preceptor is to eradicate this hatred from his pupils — all persons have agreeable qualities if we but look for them aright — 5th. pupils made sensible of their own faults and imperfections to moderate their dislike for others — 6th. how to enable students to bear ill treatment without anger and hatred — misconduct not only a crime but a misfortune — use the teacher is to make of this — anecdote — Frances and her classmate — 7th. how to treat envy and emulation — the way to cure envy — envy will cease if it finds out that its objects are wretched as it desires — 8th. special instructions to meet individual cases — ridicule a dangerous weapon — 9th. how to persuade pupils they will be gainers by the cultivation of the social feelings — this the only means to make them overcome their hateful dispositions of mind — Mr Ladd and the peace society — 10th. pupils taught their dependence on each other — their interest is not to offend — 11th. what they are to gain in manners and address — every person wishes to be agreeable — influence of social affections upon the manners — Dr Brown's definition of politeness — Addison's remarks — 12th. the face beautified by social affections — Addison's remark — handsome face impossible without sweetness of temper — 13th. social affections to be called into action by example — necessity of a teacher being amiable — Socrates by Xenophon — secret of his influence with his pupils — 14th. teachers must teach by the example of others — Pericles — his command of temper — Fenelon's method of teaching by examples — 15th. influence of christianity upon social affections — use teachers are to make of it — Robert Hall's remarks — belief in an ever present God a necessary encouragement to social virtues — such the materials of future bliss — closing address to the Institute — importance of the business of teaching argued from a comparison with other human pursuits, — its importance destined to increase with the waning of war, slavery, and vice of every description till instruction shall be the whole business of mankind excepting only the necessary care for the body — result of the whole — conclusion.

LECTURE IX.

ON THE MEANING AND OBJECTS OF EDUCATION. By T. B. Fox. 181

Story of the two knights and the shield, 183 — applied to illustrate the difference of views respecting education — different views enumerated, 184 — education defined, 185 — distinguished from instruction — education has reference to the whole man, 186 — early death, 187 — extent of the period of education, 188 — physical culture, 189 — physiology, 190 — a knowledge of it especially important to mothers, 191 — confinement in the school room, 192 — infant schools 193 — intellectual education, 194 — mode of conducting it, 195 — duty to the schoolmaster, 196 — anecdote of Stouber, 197 — moral education, 198.

LECTURE X.

ON THE MANAGEMENT OF A COMMON SCHOOL. By T. Dwight, Jr. 203

The management of a common school a difficult task, 205 — means of improvement numerous, 208 — in order to effect desirable changes it is necessary — 1st. to convince teachers that they are necessary and practicable — the evils of common schools have been long felt, 209 — description of a district school, 210 — mutual and simultaneous instruction, 211 — mode of conducting simultaneous instruction, 212 — the principle of repetition, 215 — district schools favorable for experiments in education, 215 — Punishments, 217 — useful for the teacher to recall the feelings of childhood, 218 — must love his pupils, 219 — the teacher should advance in knowledge, 220 — methods of instruction, 222 — spelling — reading — writing, 223 — English grammar, 224 — use of new forms and topics of instruction, 225 — vocal music, 226 — religious instruction — objections to it, 227 — weekly and monthly accounts, 230.

LECTURE XI.

ON MORAL AND SPIRITUAL CULTURE IN EARLY EDUCATION. By R. C. Waterston. 233

Object of the present mode of education — deficiency in moral and spiritual culture, 235 — true education defined — christian morality should be taught in schools, 236 — objections considered — 1st. the old plans are good — there is no occasion for change — 2d. danger that the work will be overdone — 3d. it would interfere with the child's freedom of mind — 4th. the mind of the child is not sufficiently matured, 237 — 5th. morality can be sufficiently taught at home — 6th. or at Sunday schools — 7th. it might interfere with private religious opinions, 238 — reasons for it — 1st. the child's nature requires it — 2d. other branches will suffer without it, 239 — 3d. it is a help to the intellect, 240 — 4th. it is of supreme importance, 241

— state of our common schools — 1st. modes of punishment, 242 — 2d. tendency of rewards — 3d. of public exhibitions, 243 — duty of a teacher — 1st. he should feel the importance of the end for which he is working — 2d. he should seek to understand his scholars, 244 — 3d. should study their dispositions — 4th. this example should be a moral lesson — 5th. should directly teach morality — 6th. should be careful in making selections for reading &c. 245 — 7th. books teaching morality should be studied, 246 — importance of the office of a school teacher — motives of the teacher, 247 — he should be respected, 248 — should be well compensated, 249 — this office should be permanent — appendix, 251.

LECTURE XII.

ON THE MORAL USES OF THE STUDY OF NATURAL HISTORY. By W. Channing, M. D. 252

Different views entertained upon this subject — extent of natural history, 254 — the vastness of the universe, 256 — its truth, 257 — its noiseless character, 258 — importance of this lesson of tranquillity to man, 259 — mode of studying the universe, 260 — the study of individuals, 261 — certainty of its results — uses of natural history, 262 — in its relations — collections are made as means not as ends, 263 — these means should be accessible to all — peculiar state of things in England and America, 266 — effect of this upon national character, 267 — communities benefitted by collections, 267.

LECTURE XIII.

ON SCHOOLS OF THE ARTS. By W. Johnson. 271

Advantages of the productive industry of nations, 273 — improvement of the human condition by the prevalent activity in the arts, 275 — feudal system, 276 — voluntary associations in Europe for promoting science, 278 — results of such associations, 279 — history of schools of the useful arts, 280 — importance of a knowledge of principles, 281 — our public works depend upon foreign capital and skill, 283 — example of France, 284 — impulse extended to England, 285 — endowment of such schools, 286 — objects of these schools, 287 — extent of the field to be cultivated, 288 — date of experimental science.
